Operating Metrics as of June 30, 2015

As a reminder, beginning in the third quarter of 2014, the Company began presenting the operating metrics of average monthly active user accounts ("MAUs") as redefined to include many emerging businesses previously not included in the Company's user account metrics. The MAUs presented herein include the user accounts in all the related business segments. As such, the MAUs presented herein should only be compared to operating metrics in the third quarter of 2014 and thereafter and not be compared to operating metrics in earlier historical periods, because there is not a way to accurately compare such results. The MAUs for the period presented herein and going forward are expected to be better aligned with the key underlying trends of a mobile internet platform company focused on driving mobile consumer traffic and engagement that can be monetized. The MAU statistics do not include the users addressed by the installation of the Company's advertising SDK into third-party applications. These indirect users generate impressions and search traffic that the Company can monetize outside of the user accounts generated directly by the Company's own portfolio of products and applications.

Average Monthly Active User Accounts as of June 30, 2015: 188.2 million.

"We are encouraged to see solid improvement in the second quarter of 2015," said Mr. Zemin Xu, CEO of NQ Mobile, "The management team remains committed to executing our business strategies, with great efforts in the monetization of our traffic-based mobile entertainment businesses, in order to achieve sustainable growth."

"Our topline growth remains strong and we, by executing our business strategies, started to see improvement in our profitability this past quarter. We are confident about our future growth and will maintain our focus on executing and delivering results." commented Mr. Roland Wu, CFO of NQ Mobile.

Second Quarter 2015 Results

Revenues

Net revenues in the second quarter of 2015 increased 25.0% year-over-year to \$102.1 million from \$81.6 million in the same period in 2014.

Mobile value added service revenues increased 8.2% year-over-year to \$31.7 million from \$29.2 million in the same period in 2014. The increase in mobile value added service revenues was primarily attributable to the growth in live mobile social video platform revenues and mobile gaming revenues. The significant increase in social video platform revenues was driven by the rapid growth of the business of Showself. And the increase in mobile gaming revenues was primarily the result of the continuing expansion of FL Mobile's business in both domestic and overseas markets, which grew 10.0% year-over-year from the same period in 2014. Meanwhile, consumer mobile security revenues decreased mainly because the Company has been moving its focus away from premium security services and focusing more on mobile applications and services.

Advertising revenues increased 6.1% year-over-year to \$16.2 million from \$15.3 million in the same period in 2014. The growth was primarily due to increased monetization through advertising and successful third party application referrals resulting mainly from WAPS and Fanyue, the Company's online and offline advertising networks.

Enterprise mobility revenues increased 48.1% year-over-year to \$52.8 million from \$35.6 million in the same period in 2014. The growth was primarily driven by the significant demand for Apple products, along with an increase in the sales of enterprise mobility software with more distribution channels which were being developed in the second quarter of 2015.

Other revenues decreased 2.5% year-over-year to \$1.4 million from \$1.5 million in the same period in 2014. Other revenues are generated primarily by providing technical contract services to third parties and fluctuate as such business is driven by individual projects.

Cost of Revenues

Cost of revenues in the second quarter of 2015 increased 41.0% year-over-year to \$76.8 million from \$54.5 million in the same period in 2014. The year-over-year increase was primarily due to higher cost of products sold for the enterprise mobility business, which totaled \$46.1 million in the second quarter of 2015 compared to \$32.7 million in the same period last year. In addition, the cost of revenue sharing, which is incurred mainly for the Company's mobile game business and live mobile social video platform, increased to \$10.8 million in the second quarter of 2015 compared to \$4.6 million in the same period last year.

Gross Profit and Gross Margin

Gross profit in the second quarter of 2015 decreased 6.9% to \$25.3 million from \$27.2 million in the same period in 2014. Gross margin, or gross profit as a percentage of net revenues, was 24.8% in the second quarter of 2015, compared with 33.3% in the same period in 2014. Excluding the impact from hardware sales of the enterprise mobility business and associated costs, gross margin was 44.6% in the second quarter of 2015, down from 55.2% in the same period in 2014.

Operating Expenses

Total operating expenses in the second quarter of 2015 decreased 52.2% year-over-year to \$23.9 million from \$49.9 million in the same period in 2014. Non-GAAP operating expenses, which exclude share-based compensation, the expenses incurred for the handling of short seller allegations and the amortization of intangible assets arising from acquisitions, decreased by 2.9 % year-over-year to \$21.9 million from \$22.5 million in the same period in 2014.

Selling and marketing expenses in the second quarter of 2015 decreased 17.1% year-over-year to \$6.7 million from \$8.1 million in the same period in 2014. Non-GAAP selling and marketing expenses, which exclude share-based compensation, decreased 18.8% year-over-year to \$6.3 million from \$7.8 million in the same period in 2014. The year-over-year decrease in selling and marketing expenses mainly resulted from the decrease in spending on the promotional channels for mobile games due to later launch of games in this quarter, as well as less expenditure on the consumer mobile security business.

General and administrative expenses in the second quarter of 2015 decreased 70.6% year-over-year to \$10.6 million from \$35.9 million in the same period in 2014. Non-GAAP general and administrative expenses, which exclude share-based compensation, the expenses incurred for the handling of short seller allegations and amortization of intangible assets arising from acquisitions, decreased 6.9% year-over-year to \$8.5 million from \$9.1 million in the same period in 2014. The year-over-year decrease in general and administrative expenses under GAAP was mainly from a significant \$23.6 million decrease in compensation expenses, as well as a large decrease in the provision of bad debt expenses.

Research and development expenses in the second quarter of 2015 increased 11.6% year-over-year to \$6.6 million from \$5.9 million in the same period in 2014. Non-GAAP research and development expenses, which exclude share-based compensation and amortization of intangible assets arising from acquisitions, increased 25.5% to \$7.1 million from \$5.6 million in the same period in 2014. The year-over-year increase in research and development expenses was primarily due to the increase in the expenditures on software development, mainly including staff costs, as a result of business expansion.

Share-based compensation expenses

Share-based compensation expenses, which were allocated to related operating cost and expenses line items, declined to \$1.1 million in the second quarter of 2015, a decrease of 95.6% from \$25.4 million in the corresponding period in 2014. The significant decrease in share-based compensation expenses was primarily due to the one-off reversal of the unvested share options related to the departure of a former executive and less equity incentives issued to the Company's acquirees.

Income/Loss from Operations and Operating Margin

Income from operations in the second quarter of 2015 was \$1.4 million, compared with an operating loss of \$22.8 million in the same period in 2014.

Non-GAAP income from operations, which excludes share-based compensation, the expenses incurred for the handling of short seller allegations and amortization of intangible assets arising from acquisitions, was \$5.2 million in the second quarter of 2015, compared with an income of \$6.5 million in the same period in 2014. Non-GAAP operating margin, or non-GAAP income from operations as a percentage of net revenues, was 5.1% in the second quarter of 2015, compared with 8.0% in the same quarter in 2014. The decrease in non-GAAP operating margin was mainly due to the decline in gross margin, which was the result of the rapid market growth of the enterprise mobility business with lower gross margin.

Foreign Exchange Gain/Loss, Interest Expenses and Other Income

Foreign exchange gain was \$0.7 million in the second quarter of 2015, compared with a loss of \$0.04 million in the same quarter of the previous year, which was affected by a fluctuation in foreign exchange rates. Interest expenses were \$1.1 million in the second quarter of 2015, compared with \$1.4 million in the same quarter of the previous year. Interest expenses were primarily derived from interest expense related to convertible debt, offset by the interest income from certain term deposits.

Income Tax

Income tax expense was \$0.4 million in the second quarter of 2015, compared with an income tax

expense of \$1.7 million in the same period in 2014.

Net Loss/Income

Net Loss attributable to NQ Mobile was \$1.6 million in the second quarter of 2015, compared with net loss of \$16.8 million in the same period in 2014. Non-GAAP net income attributable to NQ Mobile, which excludes share-based compensation, the expenses incurred for the handling of short seller allegations, interest expenses related to convertible debt, amortization of intangible assets arising from acquisition and impairment loss arising from acquisitions, was \$7.0 million in the second quarter of 2015, compared with net income of \$14.8 million in the same period in 2014.

Cash and cash equivalents, term deposits and restricted cash together amounted to \$239.4 million as of June 30, 2015.

Cash Flow

Net Cash used in operations in the second quarter of 2015 was \$14.7 million.
